Engineering student | AI & Content Enthusiast

Computer Engineering student with a strong interest in AI development and emerging technologies, complemented by excellent communication and public engagement skills. Backed by 5 years of content creation experience, including SEO writing and blogging. Certified in Quantum Computing through workshops by IIT Bombay and IBM, with a foundational understanding of concepts like entanglement and teleportation. A curious learner who blends technical exploration with creativity and entrepreneurship. Passionate about building knowledge, brick by brick — a true Philomath. Actively exploring the intersection of AI and Humans.
